

### FENCING FOR TURNSTILES

An entrance checkpoint is the first thing one sees entering a building. A presentable glass barrier increases the image of the enterprise, makes a good impression. Ovgard is pleased to offer modern barriers made of high-quality materials. Elegant rustproof glass barriers may be used at: offices, shopping centres, detached houses, as ladder or floor railings, at entrance checkpoints of enterprises and educational institutions. Thanks to high-quality materials, barriers are safe and may be used at schools and other educational institutions. They may be installed to make any desired structure of variable length, form and direction.
