

MECHANICAL SWING GATES

Swing gate BU-SW021 - entrance gate blocked with a lock. Pushing the wing opens the gates in one direction. The wing then automatically re-tracks and closes the entrance. The gate should be mounted and there-tracking speed regulated in accordance with the instruction. The equipment is intended to be used in closed places with firm floors. The system is mounted with screws and pegs. Gates are made of steel coated with nickel chromium. Weight - 12,5kg.
