

Hidden cabinet lock

KR-SK80-A

HIDDEN CABINET LOCK

Hidden electronic cabinet lock for Mifare 13,56MHz card is an ideal solution for pool cabinets, gym cabinets, employee cabinets, drawers, etc.

The lock software allows you to work in three modes:

- ⊕ 1 Permanently assigned card - means that one user can operate one or more cabinets (eg card No. 5 opens the cabinet No. 5)
- ⊕ The "first free" system - a system used in swimming pools, means that the cabinet is always open and a new user can choose any cabinet. When the card is zoomed in, the cabinet is closed. After finishing the stay, the user opens the cabinet and leaves it open to the next new user.
- ⊕ One-time mode - means that users can only open the cabinet once.

TECHNICAL DATA

Model	KR-SK80-A
Material	ABS
Dimensions	Lock body (L x W x H): 80x80x27 mm Lock hook (L x W x H): 80x21,5x27 mm
Weight	200g (with lock hook)
Battery	DC6V (4*1,5V AAA)
Driven mode	Motor/serwo
Static power consumption	15uA
Dynamic power consumption	200uA
Warning voltage	4,5V
Unlock way	Karta RFID 13,56MHz
Response time	Less than 20ms
Working temperature	-15°C - +55°C
Working humidity	5% ~ 95% RH
Working life	Standby mode 1 year
Application	School lockers, gym cabinets
