

Cabinet lock

KR-SK80-D

CABINET LOCK

Electronic cabinet lock for Mifare 13,56MHz card and code is perfect solution for pool lockers, gym cabinets, office cabinets and drawers, etc.

The lock software allows you to work in three modes:

- ⊕ Card / code permanently assigned - it means that one user can use one or more cabinet (for example card no. 5 will open cabinet no. 5)
- ⊕ Random key system - it is used at the swimming pools, what means that cabinet is open and new user can choose any of them. After approaching the card cabinet is locked. After ending visit user opens a cabinet and leaves it open for next user.
- ⊕ Single mode - it means that user can open cabinet only once.

TECHNICAL DATA

Model	KR-SK80-D
Material	ABS
Dimensions	Lock body (L x W x H): 80x80x27 mm
Lock hook (L x W x H): 80x21,5x27 mm	
Weight	200g (with lock hook)
Battery	DC6V (4*1,5V AAA)
Driven mode	Motor/serwo
Static power consumption	15uA
Dynamic power consumption	200uA
Warning voltage	4,5V
Unlock way	Card RFID 13,56MHz and code
Response time	Less than 20ms
Working temperature	-15°C - +55°C
Working humidity	5% ~ 95% RH
Working life	Standby mode 1 year
Application	School lockers, gym cabinets
