

## Cabinet lock

### I-CB-08

#### CABINET LOCK

The I-CB-08 locker lock can be mounted on wooden or metal doors. It is ideal for offices, schools, hotels as well as airports, shopping centers and sports complexes. It is possible to order a lock that supports Unique / Temic TK4100 cards at a frequency of 125 kHz.

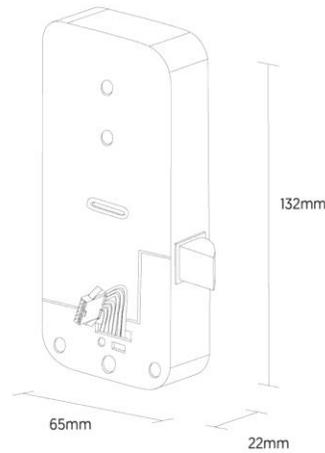

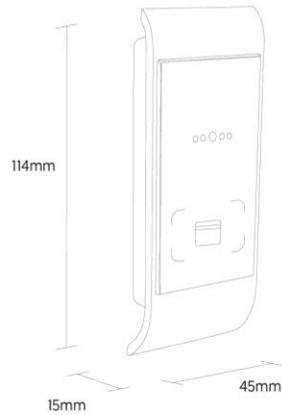

The lock can work in private and public mode.

#### Private mode

- ⦿ in this mode, the codes are assigned permanently to users (max. 15 users)

#### Public mode

- ⦿ the so-called first free; this mode works just like in swimming pools, i.e. the locker is open and anyone who comes can put their clothes there and secure them with any code. After the visit, the user opens the locker with his code and leaves it open for the next user

## TECHNICAL DATA

Model	I-CB-08
Way of opening	Mifare 13,56MHz card (optional Unique / Temic TK4100 125kHz)
Material	Zinc alloy
Power supply	DC 4,5V (AA*3)
Low battery alarm	3 Long tick before operation
Power consumption (idle)	8uA
Power consumption (in operation)	180mA
Working humidity	20-80%
Working temperature	-20°C - +70°C
Autoblock	Yes, after 7 seconds
Battery lifetime	~8 months
Open time	7 seconds
Reading distance	≤ 55mm
Door thickness	≥ 16mm
