# Digilock Cabinet Lock
Versa Keypad

The Digilock Versa Standard Keypad Cabinet Lock is a reliable electronic lock designed for surface-mounted installation in both new and retrofit projects. It operates with a numeric code and uses an automatic spring latch for quick and secure locking. In addition to keypad entry, the lock supports electronic key management and can also be accessed via a mobile application, providing flexibility for users and administrators alike.
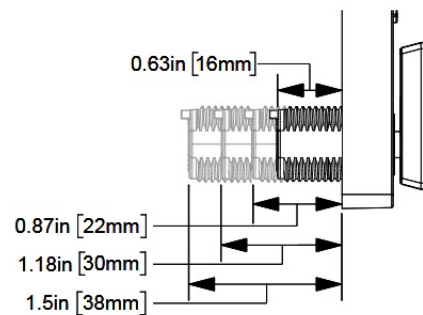

PRODUCT MAIN FEATURES

- Code entry via numeric keypad
- Operates with an auto-locking spring latch
- Optional management with an electronic key
- Mobile application access available
- Compatible with different cam types
