

Digilock Cabinet Lock

Versa RFID

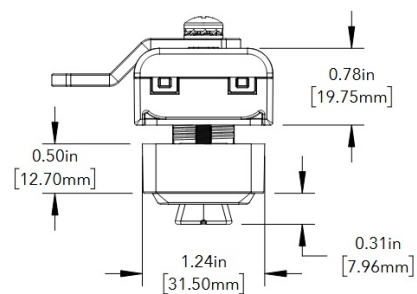

The Digilock Versa Standard RFID Cabinet Lock is a surface-mounted lock that operates with Mifare 13.56 MHz and iCLASS® proximity cards. Designed for both new installations and retrofits, it features an automatic spring latch for secure, hassle-free locking. In addition to RFID access, the lock can also be managed with electronic keys or accessed through a mobile application, providing flexible control options for users and administrators alike.

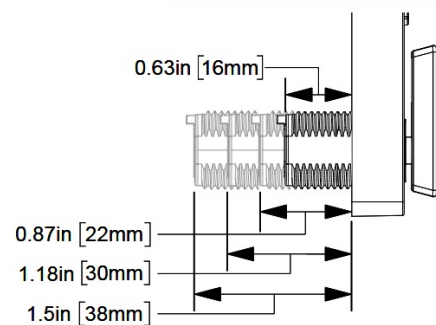

PRODUCT MAIN FEATURES

- ⤵ Operates with iCLASS® and Mifare 13.56 MHz proximity cards
