

Digilock Cabinet Lock

Versa Mini RFID

The Digilock Versa Mini RFID Cabinet Lock is a compact cam lock that operates with Mifare 13.56 MHz and iCLASS® proximity cards, making it a smaller alternative to the Versa Standard. It uses an automatic spring latch for secure locking and can also be managed with electronic keys or accessed via a mobile application, providing versatile options for both users and administrators. Designed for flexibility, it is suitable for new installations as well as retrofits.

PRODUCT MAIN FEATURES
