

Digilock Cabinet Lock

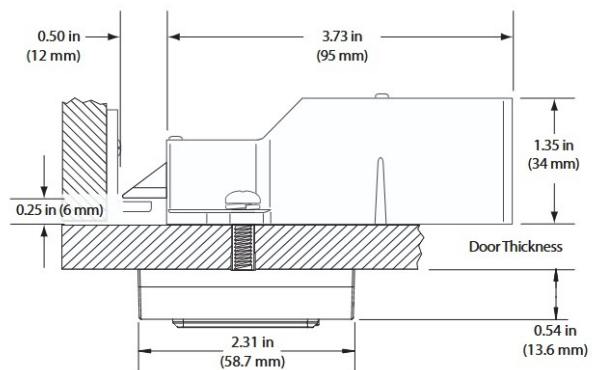

Cue RFID

Digilock Cue RFID Cabinet Lock is a modern and versatile security solution that combines durability with user convenience. Built with a solid metal housing in a brushed nickel finish, it meets stringent ISO 15693 and ISO 14443 B standards, ensuring reliable protection of stored belongings. The lock enables easy access management with an electronic key, and thanks to its flexible mounting system, it is suitable for both new installations and retrofits, adapting to doors of various thicknesses. Powered by four long-lasting batteries delivering up to 75,000 cycles, and resistant to dust and moisture, it offers dependable, maintenance-free performance. An additional advantage is the choice of two operating modes – Assigned Use and Shared Use (pool/locker room) – allowing the lock to be tailored to the facility's needs.

MAIN PRODUCT FEATURES

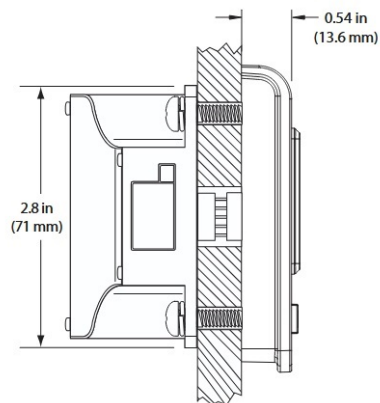

- ⌚ Operates with RFID cards compliant with ISO 14443A / ISO 14443B / ISO 15693 standards
