

#### REMOTE LOCK

The vG-BL5 lock is a model from the vG-Lock series that allows for simple and intuitive management of rooms to which we do not have daily access, but we want to have control over them, e.g. apartments for rent or office rooms. Like all vG-Lock locks, the vG-BL5 handle is also very easy to install - it works with the existing mortise lock - which allows for quick replacement. Device works with Amazon Alexa and Google Assistant. Additionally, it can be mounted on glass doors.

#### MAIN PRODUCT FEATURES

- ⊕ Generating remote codes
- ⊕ Issuing time acces
- ⊕ Opening by card
- ⊕ Emergency opening
- ⊕ Event log and history
- ⊕ Fits most doors
