

## Remote lock for apartments

### vG-BL5

#### REMOTE CONTROLLED LOCK FOR APARTMENTS

vG-BL5 is an electronic lock operating on Bluetooth, code, card, and fingerprint. The vG-BL5 lock is a model from the vG-Lock series that allows for simple and intuitive management of rooms that we do not have daily access to, but want to have control over e.g. apartments for rent or office rooms. Like all locks in the vG-Lock series, the vG-BL5 handle is also very easy to install - it works with the existing mortise lock - allowing for quick replacement. Additionally, it can be installed on glass doors.
