

Locks for glass doors

UZ-GL-JOC

ELECTRONIC LOCK FOR GLASS DOORS

The UZ-GL-JOC, made in a timeless stainless steel design, can be installed on virtually any commercially available door and electronically control access to it. Complete electronics, LED signaling, and power supply – all contained within a single small handle. Installation in the door – without the need for wiring or special tools – is quick and easy. If needed, the UZ-GL-JOC lock and fittings can be controlled via a radio network. Intuitive operation is ensured by optical LED indicators (red/green) and acoustic signals.

MAIN PRODUCT FEATURES
