

Locks for glass doors iH-GL-JOC

ELECTRONIC GLASS DOOR LOCK

The iH-GL-JOC is an electronic lock for glass doors (thickness 6–10 mm) with multiple access methods: PIN code, TTlock app, fingerprint, and mechanical key. It fits both left-handed and right-handed doors, for both indoor and outdoor use; ideal for offices and commercial buildings. Powered by batteries, it requires no wiring and is easy to install. The minimalist design combined with a solid stainless steel and PVC finish ensures aesthetics and durability, while flexible access management enhances security.
