

Remote lock for the apartments

vG-BL1 PRO

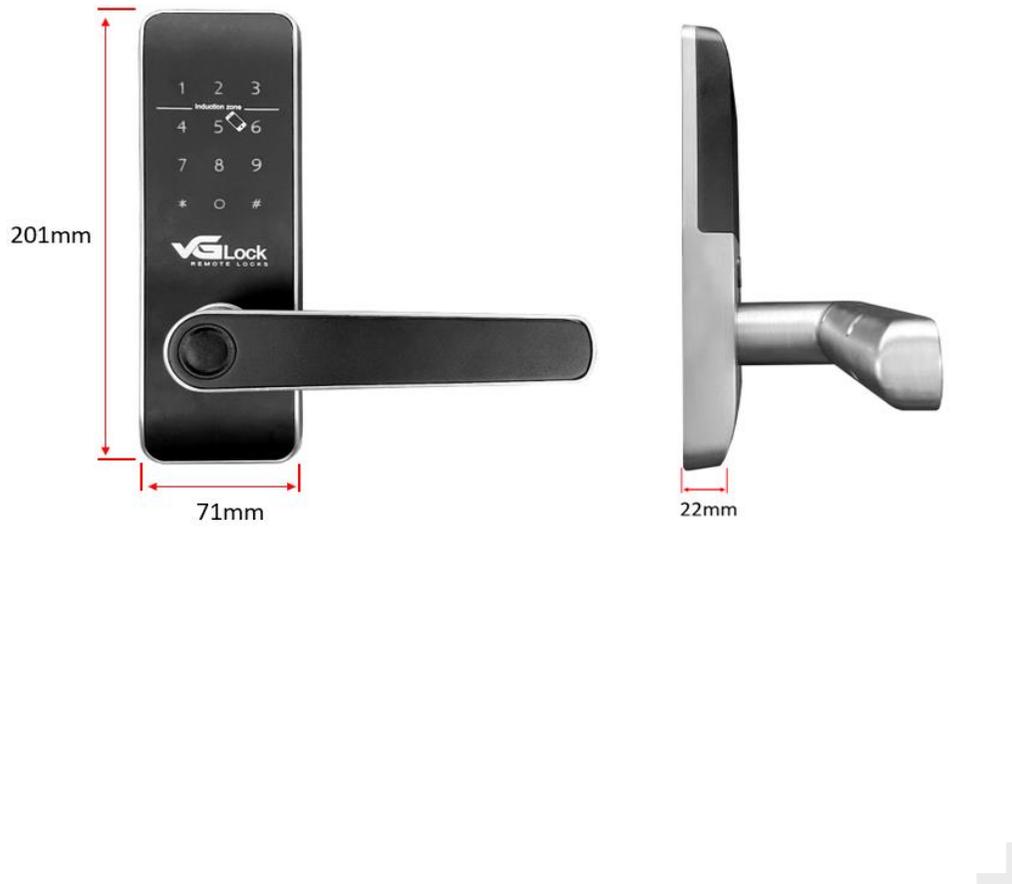

REMOTE LOCK

Smart lock that you can manage from anywhere.

The electronic code lock for the apartment vG-BL1 PRO is a modern overlay lock that is perfect for short-term rental facilities. This is a completely new version of the vG-BL1 lock with a new design. vG-BL1 PRO works with Mifare 13.56 MHz card, TTlock application, PIN code, mechanical key and fingerprint (on request). Thanks to the TTlock application, the lock can operate based on time code, permanent code or one-time codes. It also allows access to the history of events, entry and exit statistics, the presence of users in the room or controlling the battery level.

MAIN PRODUCT FEATURES

- ⊕ Opening by remote code, 13.56 MHz Mifare proximity card, mechanical key
- ⊕ and app/Bluetooth, fingerprint (optional)
