

## Remote cylinder lock

### vG-BLcylinder 4

#### REMOTE CYLINDER LOCK

vG-BLcylinder 4 is an electronic code insert for apartments and all premises for short-term rental. The device is operated by a PIN code, Mifare pendant 13.56 MHz, mechanical key and the TTlock mobile application, where you can generate codes for a specified period of time, add proximity mifare pendants, check the history of events, check the statistics of entrances and presence of its users and control the battery level. The insert has a built-in mechanical insert for emergency opening as well as a USB port for emergency charging.

#### MAIN PRODUCT FEATURES

- ⊕ Works for a PIN code, Mifare pendant 13,56 MHz, TTlock app and mechanical key
- ⊕ Power supply: 1 x CR123A (3V)
- ⊕ Emergency charging function through USB type C port
- ⊕ Auto-block function
- ⊕ It is suitable for door with 60 ~ 120 mm thickness
- ⊕ You can manage multiple locks with only one phone
- ⊕ Ability to choose from different types of passwords, e.g. time-limited password, permanent password, cyclical password, etc.
- ⊕ Multi-level administrator settings will facilitate the management of an intelligent building

## TECHNICAL DATA

Model	vG-BLcylinder 4
Dimensions of front panel	58 * 42 mm
Works for	PIN code, Mifare pendant 13,56 MHz, TTlock lock and mechanical key
Finish	Stainless steel, aluminium alloy, brass
Door thickness	60 ~ 120 mm
Power supply	1 * CR123A 3V
Battery lifetime	Approx. 10 000 cycles
Static power consumption	≤50uA
Dynamic power consumption	<200mA
Intended use	Interior use only
Recommendation	The installation of this cylinder is not recommended in areas with high traffic flow (up to 30 passages per day)
Warranty	2 years
