

## Digilock Cabinet Lock

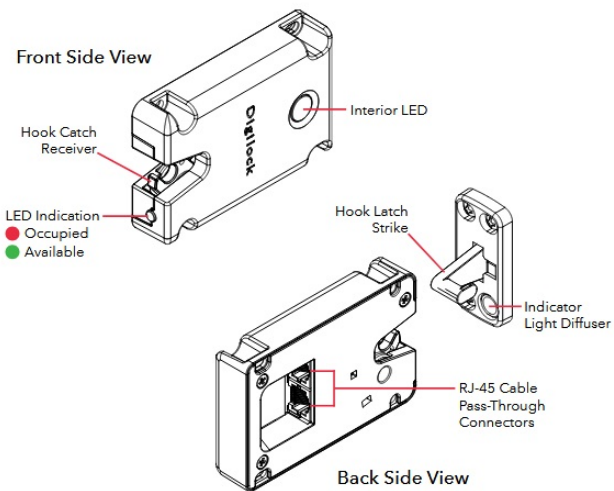

### Pivot Kiosk

The Smart Pivot Kiosk is a wired online locker system, ideal for facilities that prefer or require hardwired security solutions. The device transmits data and receives power through an RJ-45 cable. Access is provided via the Kiosk tablet using a touchscreen keypad, RFID, or mobile phone. Pivot locks are fully managed through the DigiLink® cloud platform. Through the Kiosk tablet, the lock supports Mifare 13.56 MHz, including Mifare (Classic 1K–4K, Ultralight, DESFire EV1/EV2, Plus S), as well as FeliCa, LEGIC Advant, and HID™ SEOS™. The lock features a robust locking mechanism, an external occupancy indicator, an internal LED light, and a USB-A port for user convenience.

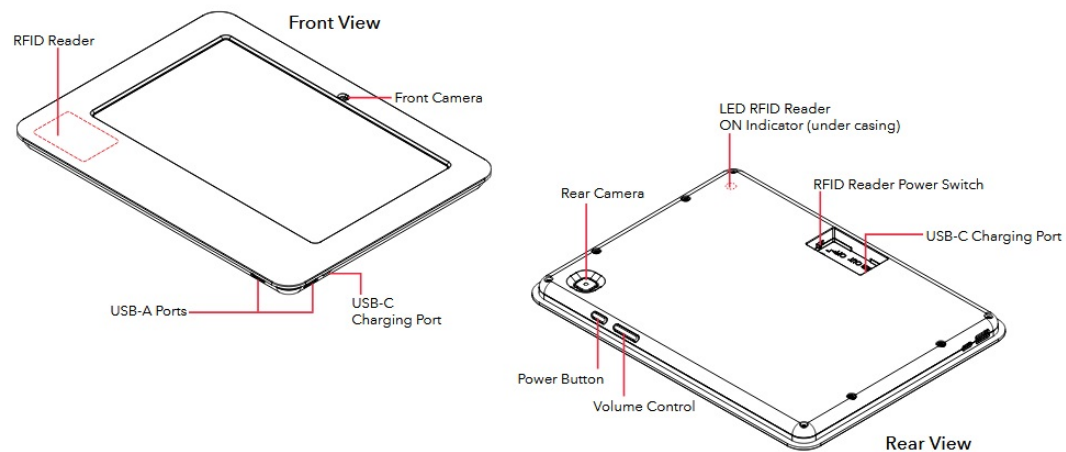

#### PRODUCT MAIN FEATURES

- ⌚ Wired power supply and data transmission via RJ-45 connector
- ⌚ Operation via Kiosk tablet
- ⌚ Internal LED light and external occupancy indicator
- ⌚ USB-A charging port available for locker users
- ⌚ Compatible with doors of all materials, including metal
