

Pivot™

A networked lock solution
for facilities that require
hardwired storage security

About Digilock

A model of reliability

Founded in Northern California in 1981, Digilock® is recognized as the global leader in keyless lock solutions, delivering more than 40 years of proven performance and pioneering 290 utility and design patents.

As storage security has evolved from metal padlocks to high tech advancements, Digilock has maintained its original mission to provide smarter solutions, simplified security, and unparalleled consumer confidence.

Engineered for anywhere

From inspiration to installation, we partner with our customers in a wide variety of industries to ensure that their facilities offer the latest in storage security solutions.

**Workspace | Education | Health/Fitness | Healthcare | Retail
Hospitality | Pro/College Sports | Manufacturing | Government**

Our core values

Innovation

Founded on innovative thinking and ground-breaking products, Digilock continues to expand and redefine what's possible in secure storage.

Service

Everything we make is backed by lifetime product support. When you have a question there will always be a real-life Digilock expert to give you the answer.

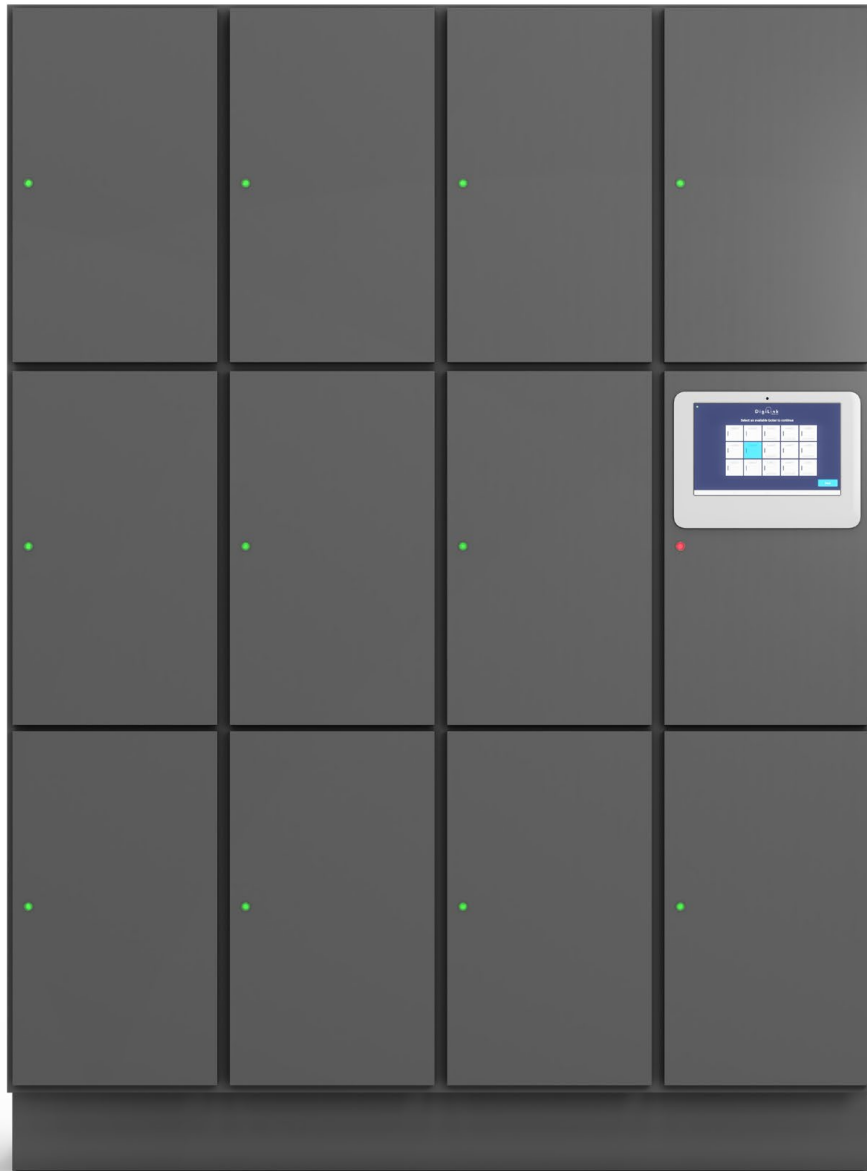

Partnership

Good relationships make happy customers, create better products, and keep Digilock at the forefront of the industry.

Dependability

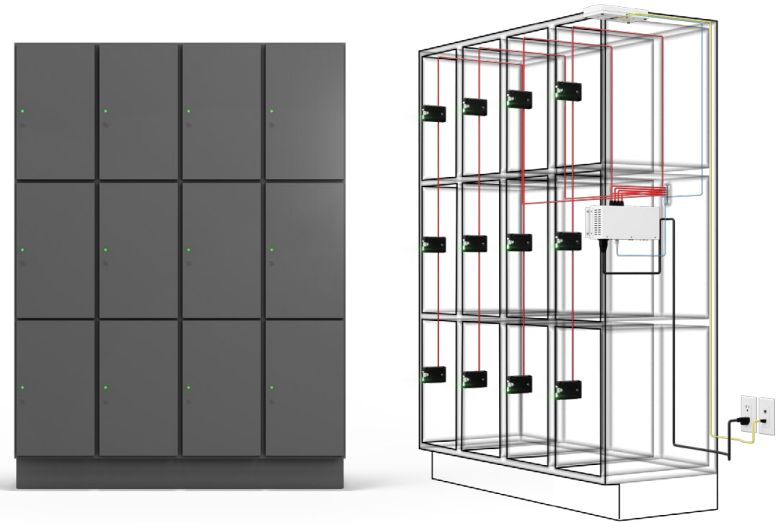

There's a reason customers have relied on Digilock for decades. We promise the same ironclad protection from the first lock to the millionth.

Pivot with lock operation at kiosk

The Permanent Solution

Pivot™ is the ideal option for facilities that prefer or require hardwired storage security. Pivot locks are available pre-installed in stationary lockers and office furniture, custom fit to your permanent storage security needs.

Pivot Pro with direct lock operation

User-Friendly Access

Choose the access that fits your people and facility:

- **Pivot™:** operate locks via kiosk with keypad, RFID, or Mobile ID
- **Pivot Pro:** operate locks directly via RFID, Mobile ID, or via optional kiosk with keypad, RFID, Mobile ID
- Flexible functionality includes Shared, Assigned, Reservations, and Parcel Pickup

Pivot

Pivot Pro

FUNCTIONALITY OPTIONS

In **Shared Use Mode**, locks are available until actively occupied by a user. The user can select and occupy any available unit by using a unique credential. Credentials depend on the user and the lock(s). Credentials include a self-selected PIN code, an RFID credential, or Mobile ID credential. The lock will remain locked until unlocked by the same PIN code, RFID credential, or Mobile ID credential. Once unlocked, the PIN code, RFID credential, or Mobile ID credential is no longer stored, and the unit is available for another user.

In **Assigned Use Mode**, the lock is programmed to allow access by a specific set of PIN codes, RFID, or Mobile ID credentials. In this functionality, the lock will only operate with the pre-programmed credentials. Assigned Use locks are designed to always be locked, whether occupied or vacant.

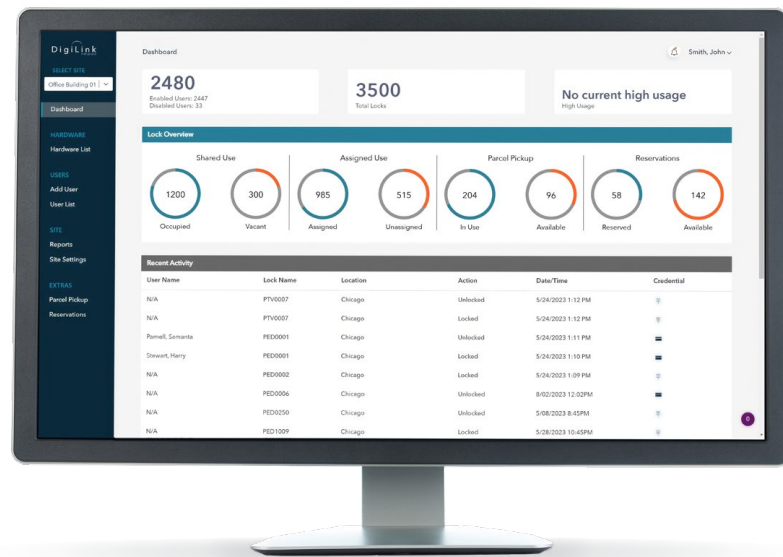

In **Reservations Mode**, users can request and schedule short-term use from available Reservation units.

In **Parcel Pickup Mode**, a parcel is placed in a secure locker. The recipient uses their unique credential(s) to retrieve the parcel.

A Smart Lock Advantage

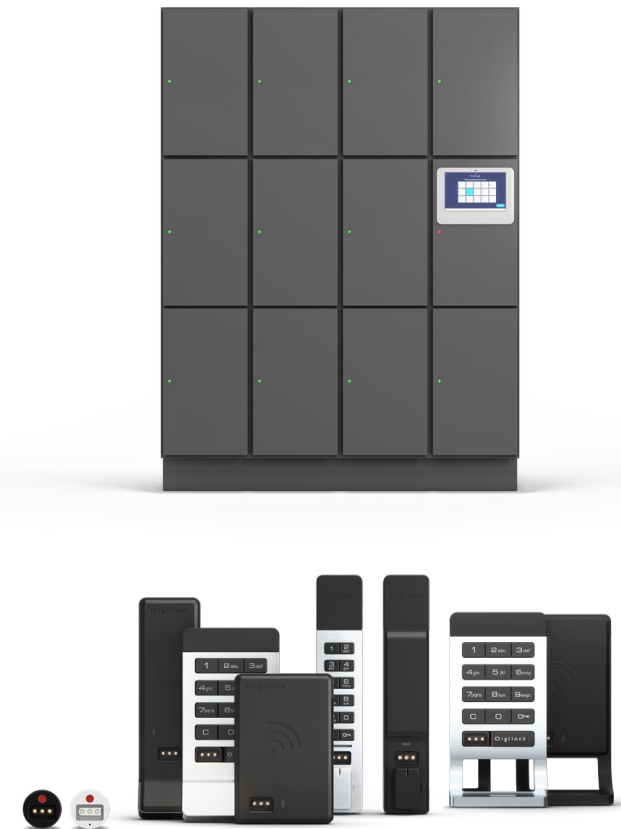

Pivot™ Smart Locks use proprietary DigiLink® cloud-based software, letting you enjoy the anytime, anywhere convenience of remote management in a hardwired system.

- Remotely manage access, locks, and users
- Assign or remove credentials instantly
- Custom dashboard for ultimate visibility, responsiveness, and reporting
- View audit trail and usage data analytics reports
- DigiLink is Soc2 Type II certified

SHARED DIGILOCK MANAGEMENT

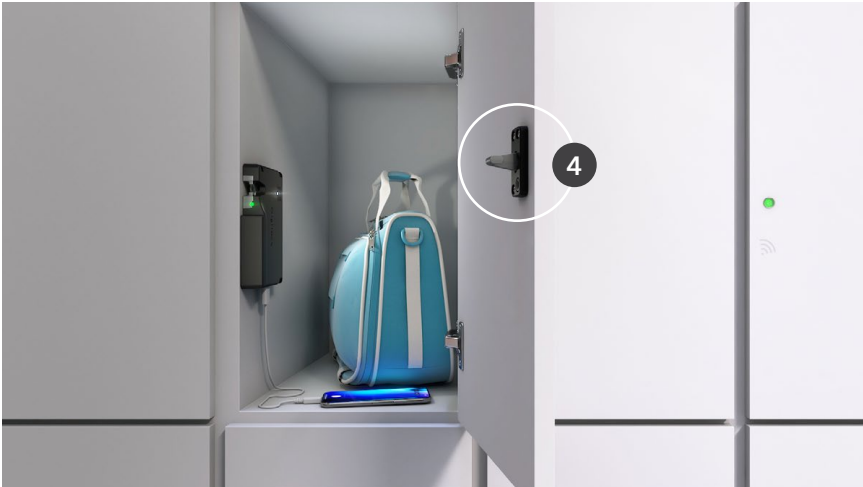

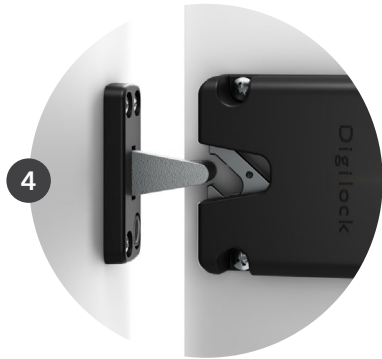

Pivot Smart Locks are managed with the same proprietary DigiLink software as our wire-free Smart Locks, giving you one convenient source for your Digilock management needs.

The Power of Pivot™

Our hardwired solution includes some brilliant features:

- 1. External LED for indicating lock use status
- 2. Internal LED to illuminate storage area
- 3. Internal USB-A for charging devices
- 4. Hook latch for push opening – no handle required
