

## DigiLock Cabinet Lock Pivot Pro

The Smart Pivot Pro is a wired online locker system, ideal for facilities that prefer or require hardwired security. The device transmits data and receives power through an RJ-45 cable. A built-in module allows direct locker access via RFID transponder or mobile application, with the Kiosk tablet available as an option. Pivot locks are fully managed through the DigiLink® cloud platform. The lock supports Mifare 13.56 MHz, including Mifare (Classic 1K–4K, Ultralight, DESFire EV1/EV2, Plus S), as well as FeliCa, LEGIC Advant, and HID™ SEOS™. It features a robust locking mechanism, an external occupancy indicator, an internal LED light, and a USB-A port for locker users.

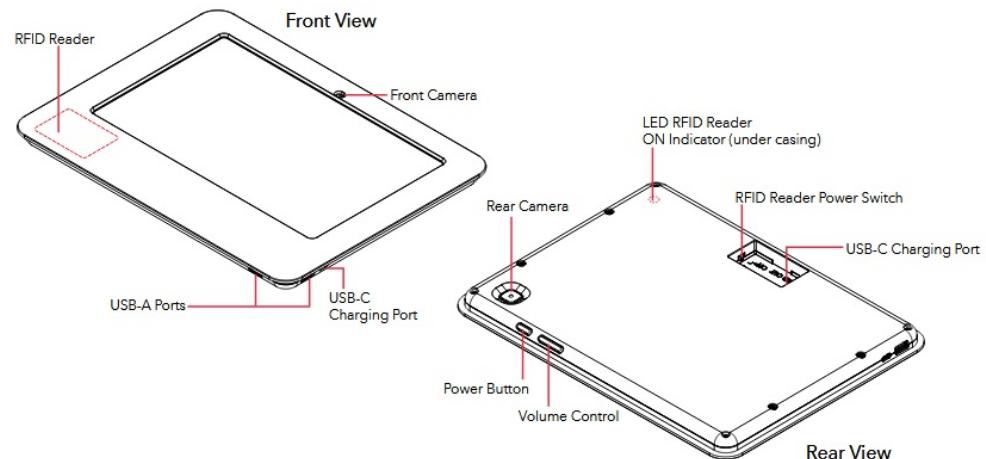

### PRODUCT MAIN FEATURES
