

Smart lock

vG-BL Automatic UP

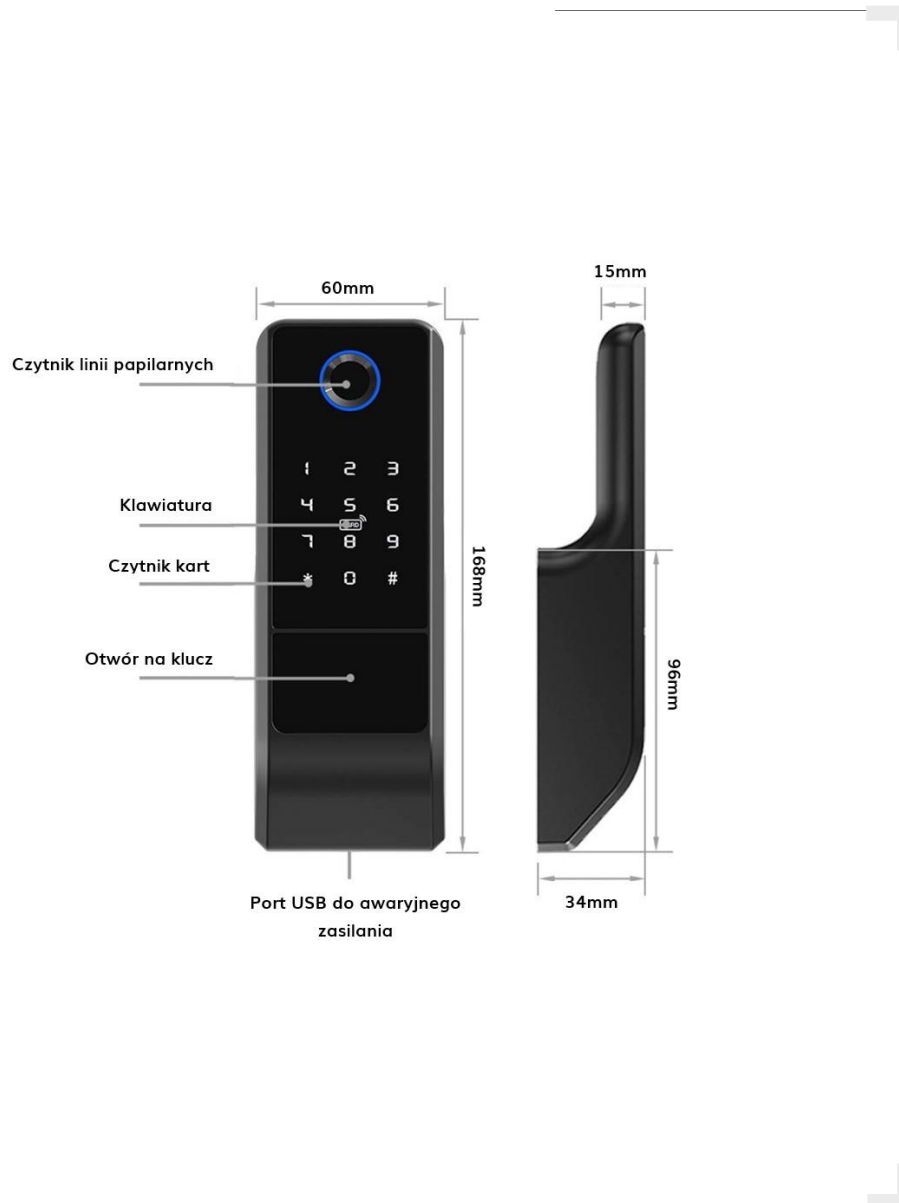

SMART LOCK

An intelligent surface-mounted lock that you can manage from anywhere.

Smart lock vG-BL Automatic UP is an automatic surface-mounted lock. It is operated through the TTlock application, where you can generate codes for a specified time, add proximity cards, check event history, and monitor battery levels. Upon receiving an opening signal, vG-BL Automatic UP automatically releases the lock latch. When the door is closed, a built-in sensor sends information to the lock and automatically locks the latch. The lock features a hidden keyhole for emergency unlocking and a USB port for emergency power supply.

MAIN PRODUCT FEATURES

- ⊕ Automatic opening and closing
- ⊕ Event log and history
- ⊕ Opening with key fobs/cards
- ⊕ Managing with the TTlock application
- ⊕ Emergency opening with key
- ⊕ Issuing time access
