

Remote lock for apartments

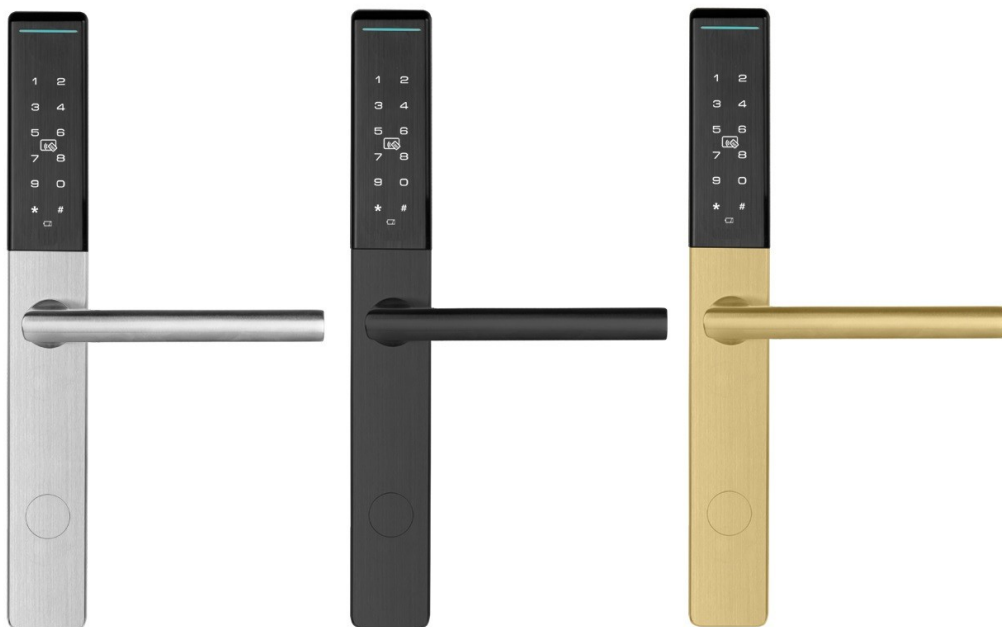

vG-BL7 EXV

REMOTE-MANAGED LOCK FOR APARTMENTS

vG-BL7 EXV is an electronic lock operating via Bluetooth, code, card, and fingerprint, designed for managing apartments, hotels, offices, and other rental spaces. The vG-BL7 EXV is an overlay lock compatible with almost all standard doors. An additional advantage is its simple and classic design. Management is handled through an intuitive application, making it easy to grant room access from anywhere in the world.
