

Local programmer

The **local programmer** is a part of the system consisting of software, lock and key, supports NFC and BLE communication simultaneously. It enables easy data exchange for Mifare RFID cards and various types of NFC and BLE electronic keys.

PRODUCT FEATURES

- Supports smart cards compliant with the ISO 14443 and MIFARE® standards, enabling read and write operations on all types of Mifare cards.
- Supports NFC communication and can work with NFC keys developed by the manufacturer.
- It supports BLE 4.0 communication and can work with Bluetooth dongles developed by the manufacturer.
- Searches for and connects only to the Bluetooth dongle placed on the programmer, ensuring fast, safe and reliable operation LED light indicators (red, green) and sound signal.
- API (PC support).

SPECIFICATION

Model	Local programmer
Dimensions	108 mm × 65 mm × 18 mm
Reading range	< 3 cm
Power supply	5V DC
Bluetooth type	BLE 4.0
Communication port	USB 2.0
Working Current	< 150 mA
