Installation Overview

Handle Direction Changing

IDENTIFY THE OPENING DIRECTION OF THE DOOR

Check the door's opening direction: if the front body is fastened on the left, it's left opening, and if it is fastened on the right, it's right opening.

(Seen from outside)

1.

1. Loosen the handle screw with allen key;
2. Take out the handle;
3. Turn and position it in the selected direction.

2.

1. Install the handle to the front panel;
2. Fix the handle with handle screw by allen key.

Handle Direction Changing

(Seen backside of the front panel)

3. 1. Loosen the clutch screw
2. Fix the clutch screw to the clutch hole according to the opening direction.

4.

1. Loosen the handle screw with allen key;
2. Turn the handle and position it in the selected direction.

5. Fix the handle with handle screw.

Installation Guide

1.

Insert the mortise to the door hole, then fix the mortise with 2 screws.

2.

1. Insert the spindle to the front panel handle hole, insert the fixing pin.
2. Install the Strut in the Front Panel.

3.

Bent the fixing pin, make sure the fixing pin can not go out.

Installation Guide

4.

Make the front panel cable and spindle get through the rubber gasket, then make the cable get through the door hole and hold the front panel onto the door.

5.

Make the rear panel cable and spindle get through the rubber gasket, then connect the cable, fix the rear panel and front panel with 2 screws.

6.

Put in 4*AA batteries, install the battery cover and fix it with screw.

Installation Guide

7.

Put the strike box into the door hole, fix the strike plate and strike box with ST screws.
