

## Digilock Advanced Tablet and Data Key

The Advanced Management Data Key and Tablet Kit provides a centralized, standalone management system based on Android. Supplied with a Samsung Galaxy Tab A preloaded with the Digilock Numeris application, it supports up to 500 unique users (250 users and 250 managers) and enables administrators to configure CarePod lock groups, manage user access, perform maintenance and diagnostics, and generate reports of the last 500 lock operations for any CarePod within the facility. Reports can be stored in the app or archived on a computer, with the option to print or share via email.
