

Digilock Cabinet Lock

Curve RFID

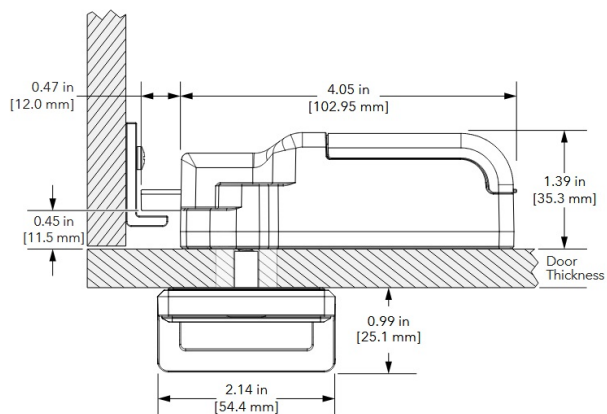

An RFID electronic lock (13.56 MHz) with a slim 0.41" (10.35 mm) profile and a fully metal housing in brushed nickel or black finish. The capacitive wake function enables touch-free activation, while visual and audio indicators along with auto-unlock enhance user convenience. The lock can operate in either Shared Use or Assigned Use mode, with management through the Basic or Advanced system. With IP55 resistance and full ADA compliance, it is a robust solution for modern access control systems.
