

Digilock Cabinet Lock

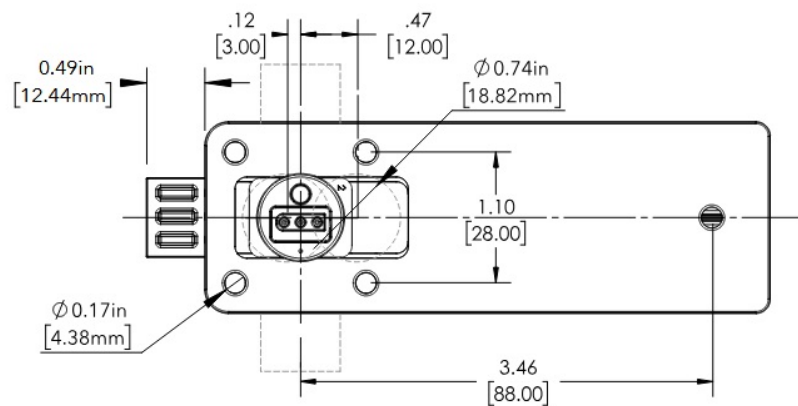

Orbit

The Orbit Digilock electronic lock is a modern solution that combines RFID 13.56 MHz technology with Bluetooth Low Energy (BLE) communication. Equipped with a capacitive wake function for touch-free activation, along with visual and audio indicators, it ensures convenient and reliable operation. The lock can be used in either Shared Use or Assigned Use mode, with management provided via the DigiLink® cloud application. Its compact design with internal mounting and an adjustable cam position makes it suitable for both new installations and retrofits. Powered by four 123A lithium batteries, and featuring IP55 resistance and ADA compliance, it is a durable and secure choice for modern access control systems.

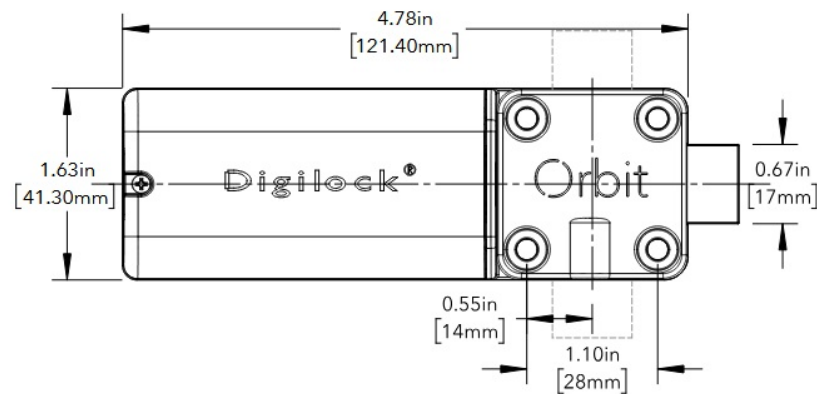

GŁÓWNE CECHY PRODUKTU

- ⌚ Supports RFID 13.56 MHz and Bluetooth Low Energy (BLE)
- ⌚ Capacitive wake – touch-free activation
- ⌚ Visual and audio indicators for intuitive operation
- ⌚ Choice of white or black cam housing
- ⌚ Multi-directional locking mechanism with 12.7 mm motorized deadbolt
- ⌚ Two modes: Shared Use or Assigned Use, managed via DigiLink®
- ⌚ Powered by 4× 123A lithium batteries
- ⌚ IP55 protection rating, ADA compliant
