Gateway

vGateway 5G WiFi

GATEWAY

The Gateway 5G WiFi (2.4G/5G) with Type-C power (DC 5V) is a smart connectivity hub that links Bluetooth TTLOCK locks to the cloud, enabling full remote access management anywhere in the world via the TTLOCK App. With dual-band Wi-Fi for fast and stable connections, it allows real-time lock control, temporary access permissions, instant notifications, and seamless integration into the TTLOCK ecosystem, all backed by robust security and a global cloud platform—an ideal solution for smart homes, hotels, short-term rentals, and commercial facilities.

What does the vGateway 5G WiFi internet vGateway give us?

- Access to the current history of events in which all entries via Bluetooth and code, incorrectly entered codes, battery status, etc. are located.
- Possibility of remote code removal - in the case when the guest leaves the apartment earlier.
- You can modify and extend the validity of the password.
- The ability to generate your own short code containing between 4 and 8 characters.
- The ability to generate one common code for the main entrance (vG-BLreader) and the apartment (for example vG-BL1).
- Synchronizing time on locks with time on your system.

What are the requirements for installing the vGateway 5G WiFi?

- In order for the vGateway to work, you must have WiFi in your property.
- The vGateway must be connected to a Wi-Fi network and be located maximum 25 meters from the Wi-Fi network Router and maximum 12 meters from vG locks with which you want to connect.
- The vGateway must also be connected to a 110 or 230 V AC power socket.

TECHNICAL DATA

Model	vGateway 5G WiFi
Power supply	5V USB
Dimensions	75*75*24mm
Network	WiFi 2.4G/5G
IEEE Standards	802.11 b/g/n/ac/ax
Finishing	ABS
Power interface	USB type C
Warranty	2 years

Smart Lock Gateway

G5
