

## Keypad

### vG-Keypad 2

#### KEYPAD

vG-Keypad 2 is a standalone, wireless keypad based on the TTLock system, designed to work with vG-BL Automatic and TTLock-series door handles. It enables secure and convenient door access using PIN codes, Bluetooth mobile app, MIFARE 13.56 MHz cards, and fingerprint authentication. With remote access management capabilities, the keypad is ideal for residential, office, and commercial applications, offering a modern and flexible access control solution. Battery power allows for easy installation without the need for wiring.
