

Coin terminal CSP-Multi-2OD

COIN TERMINAL AND PAYMENT TERMINALS

CSP-Multi-2OD is a standalone access control terminal designed for collecting usage fees for two separate restroom doors. The device supports multiple payment methods, including coins, tokens, BLIK code payments, contactless cards, and smartphones. It integrates with electric strikes and magnetic locks, providing full control over door status and occupancy monitoring. The durable steel construction and IP44 rating allow installation both indoors and outdoors.

MAIN FEATURES

- ⦿ Standalone operation – supports two doors
- ⦿ Compatible with electric strikes and magnetic locks
- ⦿ Door status and occupancy monitoring
- ⦿ Payment methods: coins, tokens, BLIK, contactless card, smartphone
