

COIN TERMINAL AND PAYMENT TERMINALS

CSP-2OD is a standalone payment terminal designed to manage paid access to two toilets or zones. After selecting the service, the fee appears on the LCD display. Once coins or tokens are inserted, the selected door unlocks. The system monitors door status and retains settings during power loss. Ideal for high-traffic public facilities.

MAIN FEATURES

- ⊕ Standalone operation – two toilets / two zones
- ⊕ LCD display 2x16 (backlit bright background, dark characters)
- ⊕ Animated “OPEN” light signaling
- ⊕ Heavy-duty service selection buttons
