

Switching power supply

12V DC 2,5A

SWITCHING POWER SUPPLY

The 12V DC 2.5A switching power supply is a compact and efficient power source designed for LED systems and low-voltage installations. It provides stable output voltage, high efficiency, and built-in protections against overload, short circuit, and overheating.

MAIN PRODUCT FEATURES

- ⊕ Constant voltage output – stable device operation
- ⊕ High efficiency and stability – reliable performance
- ⊕ Electronic protections – short circuit, overload, overheating
- ⊕ Slim compact housing – easy installation in limited space
- ⊕ 100% full-load tested – quality and durability assurance

TECHNICAL DATA

Model	12V DC 2,5A
Type	Switching power supply
Input voltage	200–240V AC
Frequency	50/60 Hz
Output voltage	12V DC
Output current	2.5 A
Power	30 W
Output type	Constant voltage
Dimming	Non-dimming
Protection rating	IP20
Protections	Short circuit / overload / over temperature
Operating temperature	-30°C to +45°C
Dimensions	166 x 51 x 15 mm
Housing	Slim
